20 June 1960

MEMORANDUM FOR: Mr. Harry Press  
Chief, Structures and Materials Division  
National Aeronautics and Space Administration

SUBJECT : Airplane Measurements of Atmospheric Turbulence Between  
20,000 and 75,000 Feet for Four Widely Separated  
Geographic Areas.

1. The attached turbulence report, identified by the subject of this correspondence, is herewith returned to you for publication as deemed appropriate by the National Aeronautics and Space Administration.

2. This document and the data relating to it are no longer considered classified and the NASA is authorized to make reference to, or include such data in technical reports. Classification references have accordingly been removed.

3. If it be the intention of the NASA to publish such material in report form, attributing the collection to the U-2 as in past reports, it would be appreciated if sufficient copies could be made available to the undersigned for inclusion in official records.
